Re: Gap Analysis

Dear Sirs

With reference to our request for a gap analysis of Comtechs company procedures, I would like to say how pleased we are with the professional and effective way the analysis was carried out.

Peter was requested to carry out a GAP analysis for the company against the requirements of ISO9001:2000.

This was conducted in a professional and effective manner and resulted in a detailed report being issued. Based on this we invited him back for a further day to propose a schedule of work relating to the introduction of some basic management systems.

Comtech Telecommunications Ltd

Comtech House, 30 Bradford Road, Leeds, LS28 6DD

Tel: 0113 256 9706 Fax: 0113 205 7567

Email: info@comtech-telecom.co.uk web: www.comtech-telecom.co.uk

Registered in England. Company Reg No. 2103247. VAT number: 431 013221

His work clarified the need for us to address our management systems first in order to gain control of both our performance and finances before considering a move to ISO9001:2000.

We would recommend Peter to new clients and have ourselves planned a 10 day programme of work with him over the coming months.

Kind Regards

Keith Jackson
General Manager
